

Tydified Beta — Tester Guide

Do chores. Earn points. Unlock rewards. Level up!

Thanks for helping test **Tydified**, a family chore & rewards app. Parents create a family, add kids, assign chores with point values, approve completed chores, and let kids redeem points for rewards. Your job: use it like a real parent would for a few days and tell us where it delights you and where it confuses you.

Everything is free during the beta. The app may show a "Tydified Plus" upgrade screen — that's expected; you don't need to buy anything (and test purchases never charge real money).

Install on iPhone (via TestFlight)

- 1 Install the free **TestFlight** app from the App Store (blue propeller icon, made by Apple).
- 2 Open the invite link we send you (text or email) on your iPhone.
- 3 In TestFlight, tap **Accept**, then **Install**.
- 4 Open Tydified from your home screen and tap **Sign Up** to create your account.
- 5 When updates come out, TestFlight will show an **Update** button — please stay current.

Invite link: _____

Install on Android (via Google Play)

- 1 Send us the **Gmail address** you use with the Play Store (we must add you to the tester list first).
- 2 Once we confirm, open the join link we send you and tap **Accept invite**.
- 3 Tap the "download it on Google Play" link on that page and install like any normal app.
- 4 Open Tydified and tap **Sign Up** to create your account.
- 5 Note: the store listing may show a temporary technical name during the beta — that's normal.

Join link: _____

What to try first (10 minutes)

- 1 Sign up and complete the welcome setup (family name + your first kid).
- 2 Create 2–3 chores from the **Chores** tab or the **Add Chore** button on Home.
- 3 Mark a chore done, then approve it from the **Review** tab — watch the points land.
- 4 Create a reward (e.g. "Movie night — 50 points") and redeem it once a kid has enough points.
- 5 Set a savings goal for a kid, tap the avatars to customize them, and try dark mode in **More**.

Feedback Questions

Answer after 2–3 days of real use. Honest beats polite!

We use two question sets. If apps come easily to you, take **Set A**. If you mostly use your phone for calls, texts, and photos, take **Set B** — your answers are the most valuable ones we get.

Set A — for the tech-comfortable tester

- 1 What broke? Describe anything that crashed, froze, double-fired, or showed stale data (and what you did right before it).
- 2 Where did the app feel slow — opening, switching tabs, approving, syncing between devices?
- 3 Did points ever look wrong after approving, rejecting, or redeeming? What sequence caused it?
- 4 What did you expect to be able to do that the app would not let you do?
- 5 How does it compare to any chore/allowance app you have tried (Greenlight, BusyKid, a chart on the fridge)? What would make you switch?
- 6 Would \$4.99/month or \$29.99/year for unlimited kids and chores feel fair for your family? Why or why not?
- 7 If you could ship one change before launch, what is it?

Set B — for the everyday phone user

- 1 Were you able to install the app with the steps on page 1? If not, where did you get stuck?
- 2 After setup, could you create a chore and give your kid points without asking anyone for help?
- 3 Was there any screen where you were not sure what to tap next? Which one?
- 4 Was the text easy to read and the buttons easy to press?
- 5 Did the app feel fun, boring, or somewhere in between? Would your kids care about the points and rewards?
- 6 Would you keep using this with your family after the test? Why or why not?
- 7 What is one thing that annoyed you, even a little?

How to send feedback

- Text or email your answers to David: **dssantiagos@gmail.com**.
- Screenshots help a lot — on iPhone press **Side + Volume Up**; on Android press **Power + Volume Down**.
- If something crashes on iPhone, TestFlight may offer "Send Feedback" — please use it; it attaches technical details automatically.

Thank you! Every answer directly shapes what launches in the App Store. — David, DS Santiago LLC
